

PNP canonical report status notice

Coordinate: PNP-HISTORICAL-REPORT-SANITIZED-2026-06-27-01

Status: public-review successor boundary

The repository contains a machine-checkable proof-certificate stack for a claimed $P = NP$ route.

Public theorem emission is disabled.

finalTheoremReady = false

activeFinalNodeIds = []

remainingBlockers = Release.UnrestrictedFinalSoundness,
ExternalReview.Acceptance

This root PDF supersedes the previous historical report as the active repository report surface.

The earlier 7072f8d report contained direct theorem-emission prose; that prose is not the current release boundary.

Verification command: npm run pnp:verify

This notice does not prove or publicly emit a theorem. It records the current non-activation boundary.
